Let's add a gallery to your site. Below your main content there are a number of options available, from adding maps to content forms.

Click on the Gallery button

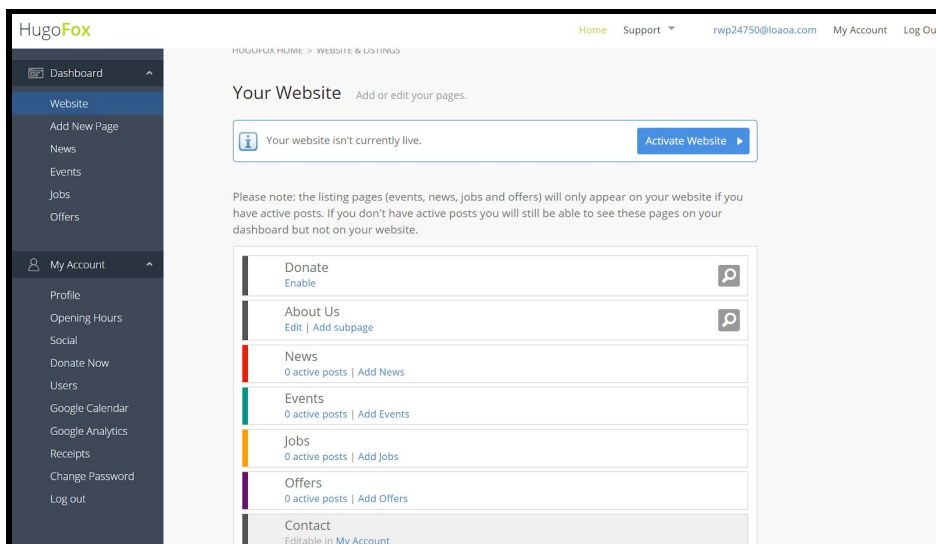

You have the option of displaying your images either in a grid format or as a Slider. For this example, let's choose a slider.

Click Preview and you will be shown how your site will look. If you're happy, click Save and Close.

The final step is to click the Activate Website button.

Your first HugoFox page has been created. You can now expand your page by adding further pages to your site.
